
**Commercial Water Treatment Solutions
Integrated Project Delivery (IPD)
For
Project Owners, Developers, Architects,
MEP Engineers & General Contractors**

The PureH2O, LTD Value Proposition

- 1. We are the only full-service water treatment technologies company in the Bahamas. Our company designs, builds and services water treatment systems for every residential, commercial and marine application. As a Bahamian owned and operated company our local market presence and technical service capabilities are unmatched in the Bahamas and Caribbean Region.**
- 2. We are the only commercial Water Treatment Systems IPD contractor in the Bahamas. We have extensive experience in all areas of general contracting, MEP engineered systems, and solar powered water treatment solutions. We have complete, in-house water treatment plant design/build and project management/engineering capabilities. We work closely with project owners, developers, architects and general contractors as a valued partner in the water treatment system design, planning and delivery process.**
- 3. We have the largest installed base of reverse osmosis and water treatment systems in the Bahamas.**
- 4. We are the only company in the Bahamas with the experience and technical resources to design, build and service large water treatment systems to 1,000,000+ GPD.**
- 5. Our customers include hotels, resorts, restaurants, residential communities, and commercial buildings.**
- 6. We operate the only full-spectrum scientific water test lab in the Bahamas.**
- 7. We have expert geological knowledge of the Bahamas Islands and broad experience in the installation of high quality seawater feed wells.**

**We are guided by integrity and superior performance in our business.
Complete customer satisfaction is our driving objective.**

We welcome your questions and are available 24/7 to serve you.
